Level II	
Department of Architecture (DIDA)	
Course coordinator	Paolo Zermani
Executive Committee	Alessandro Brodini Francesco Collotti Fabio Capanni Giuseppe Lotti Carlo Terpolilli Francesca Tosi
Contact person for information on teaching organization, class schedule, course content	Giuseppe Cosentino giuseppe.cosentino@unifi.it
Practical-professional profile of the course and industry sector of reference	The Italian design culture from the 1930s to the present day has distinguished itself in a specific field: the so-called "art of presenting," which has found in the permanent and temporary museum displays of the Masters of Italian architecture an exemplary series of applications that are still the foundation and paradigm of the discipline. "The placement of a work of art," Argan wrote, "is a critical definition in action; it is equivalent to the interpretation and revelation of what are, in our judgment, its aesthetic values; it is a way of communicating our judgment." This second-level Master Course, delivered in Italian, offers multiple and interdisciplinary educational activities to explore methods and practices related to exhibition design and museography, with particular reference to the following themes: 1. Museum design - the aspects that concern the relationship with the context, the definition of the interior space investigating the details of the layout, and the use of natural light and materials. 2. Design of temporary exhibitions, from curating to exhibition set up. 3. Exhibiting memory, or intangible cultural heritage. 4. Marketing, communication, and accessibility strategies. The main objective of the Master Course is to ensure the attainment of the skills necessary to operate consciously in the complex and changing sphere concerning the valorization of physical, intangible, and landscape cultural heritage through the project and with a view to a multidisciplinary approach. To this end, the training will consist of lectures, seminars, and conferences given by distinguished personalities from the architecture and heritage conservation world, guided tours, design workshops, and internships/practical activities at companies, institutions or design firms.
Access prerequisites	Master's degree obtained in accordance with the system under Ministerial Decree No. 270/2004 (or specialist degree under Ministerial Decree No. 509/1999 equated under I.D.
