

ISCC-9

9th International Symposium on Carbanion Chemistry

Welcome to ISCC-9

Florence, Italy, **July 20-24, 2010**

FIRST ANNOUNCEMENT

9th International Symposium on Carbanion Chemistry

We warmly invite you to participate in the 9th International Symposium on Carbanion Chemistry (ISCC-9) to be held in Florence from 20 to 24 July, 2010. The symposium will be held in Italy for the second time after the Gallipoli meeting (1992) and follows the successful series of ISCC symposia held at Durham (1984), Ottawa (1989), Gallipoli (1992), Fort Collins (1995), Sendai (1998), Marburg (2001), Alicante (2004) and Madison (2007).

The aim of ISCC is to cover all the aspects of carbanion chemistry (synthetic, mechanistic, structural and theoretical) and to promote exchange of ideas and collaborations among people. We strongly encourage younger scientists to attend the meeting in order to get in touch and see, first-hand, the state of the art in the field. A number of reduced fee registrations will be available to this purpose.

The symposium programme will feature plenary lectures, short communications, poster sessions, and exhibitions. Established leaders in the field, young and emerging investigators, and leading scientists from industry will share their results with you.

The venue for the symposium will be the [Polo delle Scienze Sociali](#) (Social Sciences Pole, Italian site) of the University of Florence, a newly built campus with excellent facilities that make it ideal for conferences.

We look forward to welcome you in Florence

Venue and Location

The 9th International Symposium on the Carbanion Chemistry (ISCC-9) will be held in Firenze Italy, July 20-24, 2010. The venue for the symposium will be the [Polo delle Scienze Sociali](#) (Social Sciences Pole, Italian site) of the University of Florence, a newly built campus with excellent facilities that make it ideal for conferences. The Polo delle Scienze Sociali is located in the northern part of Florence, in a recently restored area which encompasses the new university, the new tribunal and a park. It is close to the city centre to which it is well connected by local transportations and to the Florence airport.

FLORENCE AIRPORT <http://www.aeroporto.firenze.it>

Florence (Italian: Firenze, Old Italian: Fiorenza, Latin: Florentia) is the capital city of the Italian region of Tuscany, and of the province of Florence. It is the most populous city in Tuscany and has a population of 364,779 (696,767 in the urban area). The city lies on the Arno River and is known for its history and its importance in the Middle Ages and in the Renaissance, especially for its art and architecture. A centre of medieval European trade and finance, the city is often considered the birthplace of the Italian Renaissance; in fact, it has been called the Athens of the Middle Ages. It was long under the de facto rule of the Medici family. From 1865 to 1870 the city was also the capital of the Kingdom of Italy. The historic centre of Florence continues to attract millions of tourists each year and was declared a World Heritage Site by UNESCO in 1982.
