Practical-professional profile of the course and reference job market

This Master Course provides a unique experience in interventional pulmonology, whereby students acquire professional skills and valuable qualifications to further their professional career. The Master Course uses traditional and innovative teaching methods, including manikins, simulators, "real-time" connections with endoscopy rooms, e-learning sessions, and internships in various centres throughout the country.

The course will be conducted in Italian, partially translated into English, and published on an E-learning platform.

In particular, the course aims to form Interventional Pneumologists and other specialists interested in bronchoscopy and pleural procedures (anaesthesiologists, emergency physicians, ENT, thoracic surgeons) who will be able to find professional outlets in specialized facilities.

The synergistic contribution of University and Hospital faculty will allow the formation of versatile pulmonologists or other specialists interested in the subject who have professional skills in diagnostic and operative bronchoscopy, thoracoscopy, and artificial airway management.

The Master uses traditional face-to-face and seminar teaching methodologies and innovative methodologies involving virtual reality simulator manikins, "real-time" connections with endoscopy rooms, e-learning sessions, videoconferences, and internships in different Centres throughout the country. Lessons will be conducted according to the Flipped Classroom mode, involving preliminary consultation on the Moodle platform.

At the end of the course, students will have acquired the following knowledge and skills.

Knowledge regarding:
- Pulmonary neoplasms and solitary pulmonary nodules
- Tracheo-bronchial lesions and stenosis
- Diffuse infiltrative pneumopathies and pulmonary granulomatosis
- Lung infections in COPD and Asthma
- Pathologies of the pleura and thoracoscopy
- Emergencies
- Rare broncho-pulmonary diseases
- Thoracic-pulmonary pathologies and surgical techniques

Skills:
- Diagnostic Bronchoscopy Procedures
- Operative Bronchoscopy Procedures
- Anaesthesia in Interventional Pulmonology
- Paediatric bronchoscopy
- Pleural procedures
- Bronchoscopy in Anaesthesia and Resuscitation and in Respiratory ICUs
- Bronchoscopy in thoracic surgery
**Admission requirements**

Single-cycle Master's degree awarded in accordance with the system under Ministerial Decree No. 270/2004 (or Master's degree under Ministerial Decree No. 509/1999, equivalent under I.D. of July 9, 2009) in the class

- LM-41 Medicine and Surgery

Degree awarded under a system prior to Ministerial Decree No. 509/1999 in

- Medicine and Surgery

**Admission procedure**

Selection based on qualifications

**Duration**

9 months

**Teaching methods**

In-person, using the following methodologies: simulations, live sessions televised in the classroom, observation in the endoscopy room. Distance learning, using the following methodologies: demonstration of procedures in e-learning.

**Language the course will be delivered in**

Italian and English

**Attendance requirement**

At least 67%

**Language knowledge will be tested**

The course is delivered in both languages, Italian and English, therefore partial knowledge of both languages is required with verification by the Organizing Committee. However, simultaneous translation is foreseen using the WebEx Enterprise platform.

**Course location**

Teaching activities take place at:

- AOU Careggi, Largo Brambilla, 3, Florence;
- Department of Experimental and Clinical Medicine (DMSC), Largo Brambilla 3, Florence;
- the Student Hotel Florence OPCO, Viale Spartaco Lavagnini, 70/72, Florence;
- Menarini Foundation Auditorium, Fiesole;
- Meyer Health Campus, Via Cosimo il Vecchio 26, Florence.

**Foreseen lecture days**

Classes will be held one week per month.

**Exam procedure and schedule**

Written and a practical exam on manikins

**Final exam**

Multiple choice exam and a paper
