Procedure for the final examination and assessment

The procedures for carrying out the final examination of the doctorate follow what is foreseen for the discussion of the thesis in the bachelor and master’s degrees.

With regard to the assessment, it was deemed necessary to harmonize the types of assessment, considering that the same must be entered in the database relating to the careers of the doctoral students and is often required by the research doctors in the certificates of achievement of the title.

The grades identified are as follows: sufficient, good, very good, excellent.

The Ph.D. Office remains available for any clarification.

Kind regards
