### Practical-professional profile of the course and industry sector of reference

The course aims to provide the theoretical foundations of pediatric immunology and allergology through lectures, clinical case simulation, and an internship consisting of observational activities in pediatric immunology and pediatric allergology outpatient clinic clinical practice.

In addition, the course includes an observation part of laboratory diagnostic and research activities in pediatric immunology and allergology.

Finally, the theoretical basis of vaccinology will be provided.

Specifically, the course aims to train physicians and health professionals in the specific field of pediatric immunology and allergology.

To this end, training will be divided into face-to-face lectures (3 modules of two consecutive days each), distance learning lectures (synchronous and asynchronous), practical internship activities at pediatric immunology and allergology outpatient services, and immunology laboratory.

At the end of the course, learners will have acquired knowledge about the main diseases of the pediatric immune system (primary immunodeficiencies, autoimmune diseases, autoinflammatory diseases), principles of vaccinology, and the primary diseases of an allergic nature in pediatric age.

### Access prerequisites

Master's degree obtained in accordance with the system under Ministerial Decree No. 270/2004 (or specialist degree under Ministerial Decree No. 509/1999 equated under I.D. July 9, 2009) in one of the following classes:

- LM-6 Biology;
- LM-9 Medical, Veterinary and Pharmaceutical Biotechnology;

Single-cycle degree obtained according to the system under Ministerial Decree No. 270/2004 (or specialist degree under Ministerial Decree No. 509/1999 equated under I.D. July 9, 2009) in one of the following classes:

- LM-13 Pharmacy and Industrial Pharmacy
- LM-41 Medicine and Surgery

Degree awarded according to a system prior to Ministerial Decree No. 509/1999 in:

- Pharmacy
- Medicine and Surgery
- Biology
- Pharmaceutical Biotechnology
- Biotechnology - Veterinary biotechnology curriculum

Degree awarded according to a system prior to Ministerial Decree No. 509/1999 of closely related content, deemed suitable by the Executive Committee or a Commission specifically appointed by it.
**How the admission procedure takes place** | Selection by academic qualifications
---|---
**Duration** | 12 months
**Teaching methods** | Teaching is delivered in a blended mode. Distance learning classes will be both synchronous and asynchronous
**Language of instruction** | Italian
**Attendance requirements** | 67% of theoretical lecture and internship activities
**Location of the course** | Department of Health Sciences (DSS), Viale Pieraccini, 6 - 50139 Florence, Italy
**Foreseen lecture schedule** | The face-to-face classes are conducted in modules held on Thursdays and Fridays
**Examinations procedures and schedule** | The tests will be carried out in person, in the second semester of the course, according to a calendar agreed with the students.
**Final examination** | Submission of a written report that is presented in the form of slides.

**Description of the activities and training objectives of the internship**

For those in possession of the qualification to practice the profession, the internship will be of a welfare nature, for the other members it will be of an observational nature.

For the assistance internship it is required: registration with the Order of Doctors-Surgeons and Dentists, for those who have a degree in Biology, Medical Biotechnology, Veterinary and Pharmaceuticals, registration with the Order of Biologists is required. For students with a degree in Pharmacy and Industrial Pharmacy, registration with the Order of Chemists and Physicists is required. The master's degree is co-designed with the AOU Meyer, therefore the internship will be carried out at the Allergology and Immunology Services of this Hospital. Learners in possession of the qualification to practice the profession and registration with the relevant order, will therefore be involved in the activities carried out at these services in line with the qualification held. For those enrolled who do not have the qualification, the internship will be observational.
